

INTRODUCING POWERPULL™ OIL TUBE EXTRACTOR

PowerPull™ Oil Tube Extractor was engineered for consistent reliability in the removal of the broken oil dipstick found in Ford engines- FAST

Key drivers:

- Eliminate lifting the engine
- Eliminate oil pan removal
- Immediate ROI
- Limited Lifetime Warranty
- Made in the USA.

Our research has found current methods of removing the broken dipstick to be a frustrating and time-consuming repair, as technicians need to either lift the engine and remove the oil pan. The NEW stainless steel Extractor inserts into the damaged tube and with the aggressive thread on the tool, it bites into the steel tube and allows it to remove the damaged piece from the top of the block without any further action. PowerPull™ Oil Tube Extractor can be paired with our PowerHammer™ Assembly and together will remove the broken off tube in less than three minutes!

**GET IT IN. GET IT DONE. GET IT OUT.
TAKE IT TO THE MAXX WITH PROMAXX®**

PROUDLY MADE
IN THE USA 

Our mission at ProMAXX® is simple. Maximize the performance of the automotive technician by solving problematic repairs with unique, worry-free solutions that reduce costs, risks, and boost repair speeds—delivering more profitability to you and your operation.

Use the Extractor with the PowerHammer™ Assembly for a faster repair!
